

# RESEARCH AND INNOVATION CONSULTANT

## NUTRIENT RECYCLING / BIOBASED INDUSTRIES /

Proman Consulting is a small sized company specialised in nutrient recovery and recycling solutions, markets and legislation. We design, develop and manage innovation, research and development projects for business and non-profit organisations. We operate at the interface of academic and industrial research combining the advantages of two worlds: industry driven, economic thinking and scientific curiosity for integrated process solutions.

We are now expanding and are looking for a new motivated and dedicated team member.

### Your Profile /

You are comfortable talking and writing business and colloquial English

You have proficiency in at least one other language

You have a Masters degree (or similar) in environmental engineering, chemistry, bioscience or agriculture

You have a background in nutrient (N, P) recovery/recycling, fertiliser production or biobased waste management (including AD)

You are talkative and know how to present yourself and the company in a professional manner

You are flexible and open minded

You don't mind traveling within Europe and occasionally overseas

### We offer /

Work within a worldwide network of scientists and researchers, companies, public bodies and Universities

Wide variation of tasks

Uncomplicated work environment

Participation in EU funded projects

Possibility to bring in ideas, develop your own projects and technologies

Full-time employment, including home office to ensure a reasonable work-life balance

### How to apply /

Please send a CV and a motivational letter to [office@proman.pro](mailto:office@proman.pro). The three to five top ranked candidates will be invited to our headquarter to get to know each other and to convince us in a hearing (ppt-presentation, interview).

We offer a yearly salary of at least € 40 000, with the willingness to overpay when justified by exceptional qualities or experience.
